Status								
1)	Responsive to communication(s) filed	on 07 November 20	003.					
, —	·	o)⊠ This action is n						
3)□	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.							
Disposit	ion of Claims							
5)□ 6)⊠ 7)⊠ 8)□	Claim(s) <u>1-5</u> is/are pending in the application. 4a) Of the above claim(s) <u>3-5</u> is/are withdrawn from consideration. Claim(s) is/are allowed. Claim(s) <u>1</u> is/are rejected. Claim(s) <u>2</u> is/are objected to. Claim(s) are subject to restriction and/or election requirement.							
9) 又	The specification is objected to by the	Examiner.						
10) ☐ The drawing(s) filed on 17 January 2002 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.								
Priority (under 35 U.S.C. § 119							
 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received. 								
2) Notice	ce of References Cited (PTO-892) ce of Draftsperson's Patent Drawing Review (PT		4) Interview Summary Paper No(s)/Mail Da	ate				
	mation Disclosure Statement(s) (PTO-1449 or Per No(s)/Mail Date	PTO/SB/08)	5)	atent Application (PTO-152) 3.				

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I filed on 11/7/2003 is acknowledged.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: two semiconductor elements bonded to wiring board.

Drawings

4. Figures 4 and 5 should be designated by a legend such as -- Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

Application/Control Number: 10/052,078 Page 3

Art Unit: 2824

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Emoto (US Pre-grant publication US 2003/0045029) in view of Bertin (US Patent 5,977,640). Emoto a first semiconductor element (22) to be bonded to a wiring board in a flip-chip bonding manner (24); a sealing resin poured so as to fill a space (27), a second semiconductor element (23) provided in such a manner that a back surface thereof is fixed on an upper surface of said sealing resin and an electrode provided on a front surface thereof is connected to a segment of wiring on said wiring board by means of a bonding wire (25) (see figure 2). However Emoto fails to disclose a resin peripheral wall. Whereas Bertin et al disclose a resin peripheral wall (66) (see figure 5). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to combine the teachings of Emoto and Bertin et al. in order to include a peripheral wall (dam) because the resin dam (peripheral wall) and encapsulant protect chips and create a durability to the wirebond and chip structure (see Bertin et al. column 3 line 63-65).

Allowable Subject Matter

Application/Control Number: 10/052,078 Page 4

Art Unit: 2824

7. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record neither teaches or suggest the wherein a portion, in the thickness direction, of said second semiconductor element is buried in said sealing resin, and the front surface of said second semiconductor element is projected from the upper surface of said sealing resin.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley K Smith whose telephone number is (571)272-1884. The examiner can normally be reached on 10-6 Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Elms can be reached on (571) 272-1869. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
